

PU FOAM IMPACT PROTECTION PROFILES

A simple effective solution to help avoid accidents in the workplace

Impact protection foam profiles provide a highly visible foam protector for sharp corners, edges and vulnerable pipes. They also work well for machinery, racking or vehicles. The split sleeve is ideally designed for scaffolding protection. They are an easy and cost-effective way of avoiding accidents in the workplace.

Our impact protection profiles:

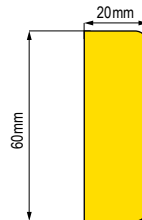

- Stays flexible from -40° to 90°
- Withstands ultra-violet light
- With or without a self-adhesive backing for easy fixing
- Supplied in standard 1m lengths
