

Help stop the spread of MRSA and C Diff with...

cordg|enic[®]
The Antibacterial
Emergency Cord

The only Antibacterial Emergency Cord

You need to grasp every opportunity to maintain cleanliness and safety within your medical facility by stopping the spread of bacterial and viral infections, which can threaten patient health and well-being.

And that's where new **Cordgienic** can help, it's a unique wipe clean pull cord for lights and emergency alarms – more than that, it has integral anti-bacterial properties that can help halt the spread of bacterial infections such as MRSA and C.Diff. The wipe clean nature will also help prevent the spread of viral infections such as norovirus.

Available in orange or white and available in 50-metre reels (other colours and lengths available by request), **Cordgienic** has multiple applications in the medical environment and can make a significant contribution to your infection control.
