

## EP22 Expandable Braided Protective Sleeving

EP22 is an expandable, close weave sleeving produced from braided polyethylene terephthalate monofilaments. The special braid construction permits the sleeving bore to be expanded up to 300% and a particular feature is its retention of roundness.

Self-extinguishing characteristics and will operate at temperatures within the range of -70°C to 150°C

EP22 has excellent resistance to damage by mechanical abrasion and repeated flexing. The monofilaments will resist attack by all common fluids.
